### FEBRUARY 2026

#### Kopri Plant – Initiatives Highlights

**Educational Visit:** Students from MET College visited the Kopri Plant to understand the processes of waste segregation, recycling, and sustainable waste management practices.

**Institutional Visit:** Members of Thane Rotary Charity Trust visited the Kopri Plant to observe the waste management operations and explore opportunities for collaboration in environmental initiatives.

**Community Participation:** Safai Sevikas from the Project Revitalisation actively participated in the Mahashivratri Laghu Rudra event, strengthening community engagement and social participation.

**Upcoming Initiative:** Samarth Bharat Vyaspeeth announced an upcoming pioneering initiative – a unique gift from the nation's capital to the sub-capital of Maharashtra, which will further strengthen environmental sustainability efforts.

**Health & Welfare Activity:** A Health Camp was organized by Rajmata Jijamata Trust for community members and workers to promote health awareness and basic medical check-ups.

**Waste Audit Activity:** Samarth Bharat Vyaspeeth conducted a waste audit at Chinmaya Mission, Powai to analyze waste generation patterns and recommend improved segregation and recycling practices.

### FEBRUARY 2026

#### Editor Note – 28th Edition

Dear Readers,

As we step into the New Year, Punarnirman brings you inspiring stories of commitment, collaboration, and conscious action that continue to shape a more sustainable and inclusive future. The month of January 2026 has been marked by impactful initiatives that reaffirm Samarth Bharat Vyaspeeth's unwavering dedication to environmental stewardship and community empowerment.

This edition highlights the successful launch of a new Dry Waste Management project in the Mira-Bhayandar region in collaboration with Bisleri, strengthening scientific waste collection, segregation, and recycling practices. The month also witnessed meaningful strides in women's empowerment through initiatives such as the Hath Gadi distribution program, providing Safai Sathis with dignified livelihood opportunities and greater economic security.

Educational exposure visits by college students to the Kopri Dry Waste Plant reinforced the importance of experiential learning, enabling young minds to understand sustainability beyond textbooks. Community support remained at the forefront through multiple donation drives, ensuring essential items reached women sanitation workers and underprivileged communities, promoting care, reuse, and social responsibility.

Together, these initiatives reflect a holistic approach—where environmental responsibility, social inclusion, and community participation come together to create lasting impact. As always, these achievements would not be possible without the continued support of our partners, volunteers, donors, and community members who believe in the vision of Punarnirman—rebuilding responsibly for generations to come.

Let us begin this year with renewed resolve, knowing that small, consistent actions can collectively lead to transformative change.

**Warm regards,**

**Vaneeta Raney, PhD**

#### Success Story of the Month

##### Dosti Vihar Vartak Nagar

Our waste management initiative was started in 2017 after the completion of the Dosti project, with a clear vision of protecting the environment and improving public health within the society. The main motivation behind starting this initiative was to ensure environmental protection, maintain proper hygiene, and control pests that often arise due to unmanaged waste. In addition, the project also aims to reduce greenhouse gas emissions by promoting proper waste segregation and treatment. Following mandatory waste management rules and regulations has been an important part of the system, helping the society move towards a more responsible and sustainable way of handling waste. Another positive outcome of maintaining a clean and well-managed environment is the improvement in the overall value and reputation of the property.

A key part of the project's success has been transparency and regular monitoring. We ensure that the STP (Sewage Treatment Plant) and OWC (Organic Waste Converter) plants are checked and updated every day. Proper records are maintained and shared in front of the society members so that everyone stays informed about the functioning and progress of the system. This practice not only builds trust among residents but also encourages them to actively participate in maintaining cleanliness and proper waste management.

The guiding thought behind continuing this initiative is the belief that "Environment protection and zero pollution is our responsibility." This idea motivates us to keep working consistently and inspires the community to remain committed to sustainable practices. Our long-term goal is to achieve zero pollution and maintain a clean and healthy environment for everyone. By taking these responsible steps today, we believe we are contributing towards protecting Mother Earth and creating a better and safer future for the next generations.
